

RealWorld Bedding in a Bag is a Pure Live Seed that works best in areas with lots of sunlight and well to moderately well drained soils. A good stand of RWWS Whitetail Bedding Mix can be achieved without any tillage of the soil provided the ground is free of other vegetation and a no-till drill is used for planting. Areas planted with this mix make ideal bedding cover for deer and other wildlife. Our seed blend contains no cheap filler seeds, contains more pounds of seed per acre and boasts of superior wildlife attraction. The RealWorld Wildlife Seed Bedding in a Bag mix is the best money can buy. We challenge you to plant our blends side by side with any other brand and feel confident that our blends will blow away the competition, either in attractiveness to wildlife, price, or, more likely --BOTH! All of our blends were developed and tested on our own hunting properties under real world conditions.
